Meet the membership and their contract team

Please RSVP to MikeKeenan@PEFencon.info to insure that sufficient food is available.

Background: Slashing or withholding workers pay in both the private and public sector has become a serious trend with employers who want to shift to working people the cost of the Wall Street crisis. IUE/CWA 81359 members at Momentive Performance Materials are only too familiar with these wage thief tactics. For 16 months, they have been fighting back against their contract having been broken in mid-term. Local 81359's pending NLRB charge seeks reinstatement of their wage cuts of 25 to 50 % and restoration of their seniority rights.

Wage Cuts Don't Work for labor or the community. This only means millions of dollars in losses and lowering the standard of living for workers and the community. Meanwhile, the wealthy owners and upper management are left untouched while the workers struggle to pay their bills!

Contract Negotiations Start June 7th
